Elk Grove Unified School District is currently recruiting tutors of Native American descent to provide academic tutoring for our program participants.

We are looking for credentialed and non-credentialed individuals who are interested in working with Native American students and dedicated to education in the Native American community.

What is the American Indian Education Program?

The Indian Education program provides special educational services to American Indian and Alaska Native children. These services include school based tutoring assistance, presentation of Native American cultural classes during regular day and after school, and outreach to parents of students who have not met grade level requirements or who are at risk.

Why Do Students Participate?

Students participate in the Indian Education program for a variety of reasons: for assistance with school work, particularly reading and math; for culturally related enrichment; for support and encouragement in the achievement of challenging standards; for assistance in working toward entering institutions of higher education.
