All Students (PDF; **Posted** 09-Jul-2015)
 This is a report produced by the California Statewide Task Force for Special Education in March 2015. It provides a blueprint for general and special education educators to work together seamlessly to address the needs of all students—as soon as those needs are apparent. Recommendations are made on how students with disabilities (SWD) receive effective services, learn in classrooms that are guided by one set of academic standards, expectations and accountability standards alongside their general education peers when appropriate, and are equipped with knowledge and skills to make their own way as adults. Within the system, services for SWD are provided from the time they are born through preschool, and until they graduate with a high school diploma or reach the age of 22; services are devised and implemented by well-prepared general and special education educators who work collaboratively to ensure the success of each student.

These schools are more successful because of two factors, school climate and school personnel resources. This study suggests that a positive school climate may be beneficial for all schools, serving all types of students. This news is especially encouraging for schools whose students face socioeconomic barriers to academic success. The Missing Piece—A Report for CASEL: A National Teacher Survey on How Social and Emotional Learning Can Empower Children and Transform Schools (PDF; Posted 11-Feb-2015) This report suggests that teachers understand that social and emotional learning (SEL)—developing competencies, including self-awareness, self-management, social awareness, relationship skills, and responsible decision-making—is critical to student success in school, work, and life. The survey results indicate that educators consider these skills to be teachable; further, they identify key accelerators for social and emotional learning.</p>	<ul style="list-style-type: none"> • Attendance • Chronic Absenteeism • Cohort Graduation • Expulsion • Facilities • Dropout rate • School Climate Surveys • Social Emotional Learning Surveys • Suspension • PBIS Assessments- Tiered Fidelity Inventory, Self-Assessment Survey and Team Implementation checklist

The goal of this report is to create safe schools where effective teaching and learning can take place. The Department of Education identifies three guiding principles for policymakers, district officials, school leaders, and stakeholders to consider in improving school climate and discipline. They are to: create positive climates and focus on prevention; develop clear, appropriate, and consistent expectations and consequences; and to ensure fairness, equity, and continuous improvement. The U.S. Department of Education has identified three guiding principles to improve school climate and discipline for all students: climate and prevention; clear, appropriate, and consistent expectations and consequences; and equity and continuous improvement. There are action steps listed for each of the guiding principles which may be considered when creating a positive climate, including evidence-based strategies, professional development, collaborative partnerships, policy development, family engagement, and data analysis.
