Note: "Fam." is the number of families, or the unduplicated count of unique addresses with at least 1 student enrolled during the survey window. "% Imp." refers to the percentage of respondents who rated the item as "very important" or "most important." "% Sat." denotes the percentage of respondents who rated the item as "very satisfied" or "satisfied." To reduce survey length, respondents were only asked to rate satisfaction if they rated importance as "most important." Ranks are based on the "% Imp."--lower ranks indicate higher importance--and duplicated ranks indicate ties between items.

Helen Carr Castello

Note: "Fam." is the number of families, or the unduplicated count of unique addresses with at least 1 student enrolled during the survey window. "% Imp." refers to the percentage of respondents who rated the item as "very important" or "most important." "% Sat." denotes the percentage of respondents who rated the item as "very satisfied" or "satisfied." To reduce survey length, respondents were only asked to rate satisfaction if they rated importance as "most important." Ranks are based on the "% Imp."--lower ranks indicate higher importance--and duplicated ranks indicate ties between items.

Ellen Feickert

Note: "Fam." is the number of families, or the unduplicated count of unique addresses with at least 1 student enrolled during the survey window. "% Imp." refers to the percentage of respondents who rated the item as "very important" or "most important." "% Sat." denotes the percentage of respondents who rated the item as "very satisfied" or "satisfied." To reduce survey length, respondents were only asked to rate satisfaction if they rated importance as "most important." Ranks are based on the "% Imp."--lower ranks indicate higher importance--and duplicated ranks indicate ties between items.

Roy Herburger

Note: "Fam." is the number of families, or the unduplicated count of unique addresses with at least 1 student enrolled during the survey window. "% Imp." refers to the percentage of respondents who rated the item as "very important" or "most important." "% Sat." denotes the percentage of respondents who rated the item as "very satisfied" or "satisfied." To reduce survey length, respondents were only asked to rate satisfaction if they rated importance as "most important." Ranks are based on the "% Imp."--lower ranks indicate higher importance--and duplicated ranks indicate ties between items.

Robert J. McGarvey

Note: "Fam." is the number of families, or the unduplicated count of unique addresses with at least 1 student enrolled during the survey window. "% Imp." refers to the percentage of respondents who rated the item as "very important" or "most important." "% Sat." denotes the percentage of respondents who rated the item as "very satisfied" or "satisfied." To reduce survey length, respondents were only asked to rate satisfaction if they rated importance as "most important." Ranks are based on the "% Imp."--lower ranks indicate higher importance--and duplicated ranks indicate ties between items.

David Reese

Note: "Fam." is the number of families, or the unduplicated count of unique addresses with at least 1 student enrolled during the survey window. "% Imp." refers to the percentage of respondents who rated the item as "very important" or "most important." "% Sat." denotes the percentage of respondents who rated the item as "very satisfied" or "satisfied." To reduce survey length, respondents were only asked to rate satisfaction if they rated importance as "most important." Ranks are based on the "% Imp."--lower ranks indicate higher importance--and duplicated ranks indicate ties between items.

Mary Tsukamoto

Note: "Fam." is the number of families, or the unduplicated count of unique addresses with at least 1 student enrolled during the survey window. "% Imp." refers to the percentage of respondents who rated the item as "very important" or "most important." "% Sat." denotes the percentage of respondents who rated the item as "very satisfied" or "satisfied." To reduce survey length, respondents were only asked to rate satisfaction if they rated importance as "most important." Ranks are based on the "% Imp."--lower ranks indicate higher importance--and duplicated ranks indicate ties between items.

Samuel Jackman

Note: "Fam." is the number of families, or the unduplicated count of unique addresses with at least 1 student enrolled during the survey window. "% Imp." refers to the percentage of respondents who rated the item as "very important" or "most important." "% Sat." denotes the percentage of respondents who rated the item as "very satisfied" or "satisfied." To reduce survey length, respondents were only asked to rate satisfaction if they rated importance as "most important." Ranks are based on the "% Imp."--lower ranks indicate higher importance--and duplicated ranks indicate ties between items.

Note: "Fam." is the number of families, or the unduplicated count of unique addresses with at least 1 student enrolled during the survey window. "% Imp." refers to the percentage of respondents who rated the item as "very important" or "most important." "% Sat." denotes the percentage of respondents who rated the item as "very satisfied" or "satisfied." To reduce survey length, respondents were only asked to rate satisfaction if they rated importance as "most important." Ranks are based on the "% Imp."--lower ranks indicate higher importance--and duplicated ranks indicate ties between items.

Note: "Fam." is the number of families, or the unduplicated count of unique addresses with at least 1 student enrolled during the survey window. "% Imp." refers to the percentage of respondents who rated the item as "very important" or "most important." "% Sat." denotes the percentage of respondents who rated the item as "very satisfied" or "satisfied." To reduce survey length, respondents were only asked to rate satisfaction if they rated importance as "most important." Ranks are based on the "% Imp."--lower ranks indicate higher importance--and duplicated ranks indicate ties between items.

Las Flores

Note: "Fam." is the number of families, or the unduplicated count of unique addresses with at least 1 student enrolled during the survey window. "% Imp." refers to the percentage of respondents who rated the item as "very important" or "most important." "% Sat." denotes the percentage of respondents who rated the item as "very satisfied" or "satisfied." To reduce survey length, respondents were only asked to rate satisfaction if they rated importance as "most important." Ranks are based on the "% Imp."--lower ranks indicate higher importance--and duplicated ranks indicate ties between items.
